The Turkey Farmers of Canada (TFC), established in 1974, is charged with administering the orderly marketing system for turkey in Canada. TFC's primary purpose is to provide price and supply stability by gearing production towards market needs. The Agency represents 551 turkey producers in eight provinces and, in addition to market analysis, is also actively involved in areas such as: research, marketing, food safety, policy development, trade, and regulatory analysis. The TFC has developed a comprehensive communications strategy to provide information on the above issues to producers, industry, government, and the public on a regular basis.
